Delta R Full Color

40 RGB Full Color LEDs/ LED power 3W
 2.800 Lumens / 370 Lux at 5 m (medium flood lenses)
 RGB color generation / 16 million colours
 Colour temperature variable on a linear range (3.200°K÷5.500°K)
 No infrared emission / no ultraviolet emission
 LEDs average lifespan: 100.000 hours
 Optical units can be interchanged by users (spot / medium /wide)
 Interface: OLED display + 4 buttons / infrared remote control
 Control signals: USITT DMX 512 USITT serial digital signals
 15 DMX channels
 Independent operation (Master / Slave)
 Programmable automated playback (7 days)
 Movement on 3 axes : Pan 320° /Tilt1 160°(Motorized) / Tilt2 135°(Manual).
 Safety-locking system
 IP65 protection level
 Professional HARTING / ILME sockets (IP65 protection rating)
 Full range AC 90-260V, 50-60Hz power supply
 Operating ambient temperature -10° / 40°
 Weight: 24 Kg

ACCESSORIES

Lenses set spot (cod. 03.LK.008)
 Lenses set medium flood (cod. 03.LK.001)
 Lenses set wide flood (cod. 03.LK.002)
 Flight case for 1 DELTA (cod. 0521C029)
 Flight case for 2 DELTA (cod. 0521C030)
 Safety wire (3mm x 60 cm), Ring spring catch (max. capacity load 60Kg) (Cod. 0521A010)
 "C" Clamp GQUICK with "Fast Lock" connection ¼ turn (max. load 80Kg) (cod. 0521A014)

Dimensions (LxDxH)
 projector 430 x 285 x 570 mm

Weight 24 Kg (motorized version)

Packaging Dimensions (LxDxH)
 530 x 500 x 660 mm

Weight 30 Kg (motorized version)

Delta R Triled

20 LEDs / TRILED technology / LED power 1W x 3
 2.400 Lumens / 450 Lux at 5 m (medium flood lenses)
 RGB color generation / 16 million colours
 Colour temperature variable on a linear range (3.200°K÷5.500°K)
 No infrared emission / no ultraviolet emission
 LEDs average lifespan: 100.000 hours
 Optical units can be interchanged by users (spot / medium flood / wide flood)
 Interface: OLED display + 4 buttons / infrared remote control
 Control signals: USITT DMX 512 USITT serial digital signals
 15 DMX channels
 Independent operation (Master / Slave)
 Programmable automated playback (7 days)
 Movement on 3 axes : Pan 320° / Tilt1 160°(Motorized) / Tilt2 135°(Manual)
 Safety-locking system
 IP65 protection level
 Professional HARTING / ILME sockets (IP65 protection rating)
 Full range AC 90-260V, 50-60Hz power supply
 Operating ambient temperature -10° / 40°
 Weight: 24 Kg

ACCESSORIES

2- IMPORTANT SAFETY INFORMATION

2.1 Fire prevention:

- Never locate the fixture on any flammable surface.
- Minimum distance from flammable materials: 1 m.
- Minimum distance from the closest illuminable surface: 1 m.
- Replace any blown or damaged fuses only with those of identical value. Refer to the wiring diagram if there is any doubt.
- Connect the projector to mains power via a thermal magnetic circuit breaker.

2.2 Prevention of electric shock:

- High voltage is present inside the unit. Isolate the projector from the mains supply prior to performing any function which involves touching the inside of the unit.
- The level of technology inherent in the DELTA R requires the assistance of specialised personnel for all servicing. Please refer to an authorised DTS service centre.
- A good earth connection is essential for proper functioning of the projector.
Never connect the unit without proper earth connection.
- The fixture should be located in places with a good air ventilation.

2.3 Protection against direct light radiation:

- Never turn the unit on if any of the lenses or the glass lenses protection is damaged.
- Never look directly at the LEDs when they are on.

2.4 Safety:

- The projector should always be installed with bolts, clamps and other tools that are capable of supporting the weight of the unit.
- Always use a second safety chain to sustain the weight of the unit in case of the failure of the main fixing point.
- The external surface of the unit, at various points, may exceed 80°C. Never handle the unit until it's on.
- Never install the fixture in an enclosed area lacking sufficient air flow.
- The ambient temperature should not exceed 40°C.

2.5 Level of protection against the penetration of solid and liquid matter:

- The projector is classified as an ordinary appliance and its protection level against the penetration of solid and liquid matter is IP 65.

3- VOLTAGE AND FREQUENCY:

Delta R can operate at 90-270V, 50 or 60 Hz.

4- INSTALLATION:

Delta R may be either floor or ceiling mounted.

For floor mounting installations, the unit is supplied with four rubber mounting feet on the base.

For ceiling mounted installations, we recommend the use of appropriate clamps to fix the unit to the mounting surface.

The supporting structure from which the unit is hung should be capable of bearing the weight of the unit, as should any clamps used to hang it. The structure should also be sufficiently rigid so as not to move or shake whilst the Delta R is moving.

The Delta R is fitted with 4 fixing points on the bottom used to attach accessories (clamps, hooks, etc.) With a fast lock closure/release system (1/4 turn) to fix the fixture in any position.

4.1 Safety cable:

We recommend the use of a safety cable or chain connected to the Delta R and to the suspension truss in order to avoid the fixture accidentally falling should the main fixing point fail. Make sure that the iron cable or chain can bear the weight of the entire unit.

You may attach the safety chain to the holes located on the base of the fixture, as shown in the picture below.

4.2 Risk of fire:

Each fixture produces heat and must be installed in a well-ventilated position. The minimum recommended distance from flammable material is 1m. Minimum distance from the object being illuminated is 1 m.

4.3 Ambient temperature:

The projector should never be installed in places that lack a constant air flow. The ambient temperature should NOT exceed 40°C.

5- MAINS CONNECTION:

Delta R can operate at 90-270V, 50 or 60Hz.

For connection purposes, ensure that your plug can handle at least 300W power consumption.

Strict adherence to regulatory norms is strongly Recommended.

FUSE: T 3,15A

MAINS
Electronic ballast
90-260V 50 / 60Hz

5.1 Protection:

The use of a thermal magnetic circuit breaker is recommended for each Delta R. A good earth connection is essential for the correct operation of the projector.

6- DMX SIGNAL CONNECTION:

The unit operates using a digital DMX 512 (1990) signal. Connection between the control box and the projector or between projectors must be carried out using a two pair screened ø0.5 mm cable and a CANNON XLR 5 or 3 pole connector.

Ensure that the conductors do not touch each other. Do not connect the cable ground to the XLR chassis. The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first projector to the DMX IN plug of the second one.

In this way, all the projectors are cascade connected.

P.S:

If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX reception problem

6.1 DMX Addresses:

DELTA R have 15 DMX control channels.

Here below are described the DMX channels addressing for the controller:

Projector 1	A001
Projector 2	A016
Projector 3	A031
.....	A....
projector 6	A091

6.2 Selecting the DMX address:

1) Press the UP-DOWN key until you reach the required DMX address. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).

2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now controlled by the new DMX address.

TIPS: if you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

7- Movement

The projector has a maximum movement of 320° for Pan, 180° for Tilt 1 and 135° for tilt 2 (7 mechanical steps 22,5° each).

DO NOT place any obstructions in the path of the projector's movement.

8- DISPLAY FUNCTIONS

DISPLAY FUNCTIONS

The DELTA R display panel shows all the available functions . Using these functions, it is possible to change some of the parameters and add some functions. Changing the DTS setting can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

Mode Recorder

RECORDER Mode

Input Mode MANUAL
Select Chase CPR1

In Manual Recording Mode, it is possible to create and store the steps of the chase by using the unit display panel and buttons.

RECORDER MODE SETTING
This menu let you create 2 different chases, CPR1 and CPR2 (16 steps each) that will then run in Master Mode.
Two different recording mode are available:
1) Manual Recording Mode
2) DMX Recording Mode

Three different options are available:
1) EDIT = Let you modify and store new values for all the channels on the selected Step.
2) WIEV MEM = Let you see the existing programmed steps of the chase
3) SET LAST = Let you set the last step to be ran on the chase.

1) Manual Recording Mode

RECORDER MANUAL
CPR1 STEP 01 EDIT
PAN 016 TILT 255
SHUTTER 009 DIMM 017
R 016 G 016 B 000
WHITE 012 CTC 000
MACRO 000

2) DMX Recorder Mode

To program CPR1 and CPR2 by using a DMX controller, 3 more DMX channels are needed in addition to the 15 channels necessary to control the unit.
So that in RECORDER mode (via DMX) the unit will need 18 channels to be correctly programmed.
The 3 new DMX channels are:
DMX channel 16 = STEPS channel
From 0 - 15 = VIEW DMX, the unit shows the values received from the DMX controller in that moment.
From 16 - 255, the previously programmed steps (16 steps from 01 to 16) are displayed.
DMX channel 17 = VIEW / EDIT / SET LAST channel
If channel 16 (STEPS channel) is set to value 0 - 15, the DMX channel 17 has no functions.
If channel 16 (STEPS channel) is set to value 16 - 255, the DMX channel 17 has the following functions:
From 0 - 19 = VIEW MEM, the unit shows the previously programmed steps.
From 20 - 234 = EDIT, the unit runs the configuration given by the DMX controller in that moment.

RECORDER Mode

Input Mode DMX
Select Chase CPR1
Warning 18 channels !

In DMX Recording Mode, it is possible to create and store the steps of the chases by using an external DMX controller.

WARNING !

To program CPR1 and CPR2 by using a DMX controller, 3 more DMX channels are needed in addition to the 15 channels necessary to control the unit.

RECORDER DMX
CPR1 STEP 01 EDIT
PAN 016 TILT 255
SHUTTER 009 DIMM 017
R 016 G 016 B 000
WHITE 012 CTC 000
MACRO 000

With the STEPS channel it is possible to select the step to create, while with REC channel it is possible to store the configuration on the selected step.-
From 234 - 255 = SET LAST, the unit runs the configuration given by the DMX controller in that moment closing the Program as last step.
With the REC channel it is possible to record the selected step as last step to be ran on the Program.

DMX channel 18 = REC channel
REC channel saves the configuration given by the DMX controller in the selected step: you change the DMX value from 0 to 255 (the display shows "WRITING" indicating that the step has been recorded). We suggest to keep the REC channel set to 0 and to run through the 255 only once you have decided to save the new configuration. If CPR1 or CPR2 are not closed, by indicating the last step (Edit channel between 235-255), all 16 steps will be played through in playback mode, even if not programmed.

Mode Master

MASTER MODE SETTING

This menu allow to set Delta R as master unit (No DMX signal must be present on unit's DMX input panel).

The unit will ran in automatic mode without needing of an external controller.

Different chases are selectable by user

CPR1/CPR2/CPR1&2

Chases with 16 steps previously created in RECORDER mode.

Time and Wait time selectable by user

CRNB

Rainbow colours effect.

Time and Pan&Tilt selectable by user

This menu allow to set the Pan
minimum position (Default =000)

Setting Pan Min

Pan Min : 000

Range 000-255
Default = 000

Pan Max

PAN MAXIMUM POSITION
This menu allow to set Pan
maximum position (Default = 255)

Setting Pan Max

Pan Man : 000

Range 255-000
Default = 255

Tilt Min

TILT MINIMUM POSITION
This menu allow to set the Tilt
minimum position in degrees
(Default =000)

Setting Tilt Min

Tilt Min : 000

Range 000-255
Default = 000

Tilt Max

TILT MAXIMUM POSITION
This menu allow to set the Tilt
maximum position (Default = 255)

Setting Tilt Max

Tilt Max : 000

Range 255-000
Default = 255

Calibrate Pan

PAN CALIBRATION
This menu allow to calibrate Pan
home position (Default = 105)

Calibrating Pan

Pan : 105

Range 000-255

Calibrate Tilt

TILT CALIBRATION
This menu allow to calibrate Tilt
home position (Default = 128)

Calibrating Tilt

Tilt : 105

Range 000-255

 Invert Pan PAN INVERSION This menu allow to set the Pan movement. Normal or Inverted	 	<div>Set PAN INVERSION</div> <div>Pan : Normal</div> <div>Actual Normal</div>	Pan movement Normal or Inverted Default = Normal 
 Invert Tilt TILT INVERSION This menu allow to set the Tilt movement. Normal or Inverted	 	<div>Set TILT INVERSION</div> <div>Tilt : Normal</div> <div>Actual Normal</div>	Tilt movement Normal or Inverted Default = Normal 
 Swap Pan&Tilt PAN&TILT SWAP This menu allow to invert the control of Pan with the control of Tilt.	 	<div>Set Pan/Tilt SWAPPING</div> <div>Swap : Normal</div> <div>Actual Normal</div>	Pan control inverted with Tilt control and vice versa Dfault = Normal 
IMPORTANT: (During PAN/TILT MIN,PAN/TILT MAX and PAN/TILT CALIBRATE setting,PAN/TILT INVERT and PAN/TILT SWAP are disabled)			
 Encoder ENCODER SETTING This menu allow to enable/disable the auto-repositioning function for Pan and Tilt	 	<div>Set Encoder Status</div> <div>Encoder : Active</div> <div>Actual Active</div>	Pan/Tilt auto-repositioning system enabled or disabled Default = Active 
 Reset Pan & Tilt PAN&TILT RESET This menu allow to reset Pan and Tilt Motors		<div>Resetting Pan & Tilt</div> <div>PRESS ENTER To RESET Pan & Tilt</div>	Pan &Tilt motors reset 
 Speed Pan & Tilt PAN & TILT MAXIMUM SPEED This menu allow to set the maximum speed for Pan & Tilt movement.	 	<div>Set SPEED MAX P&T</div> <div>Speed MAX % 100</div>	Pan&Tilt maximum motor speed Selectable between 25-100% 

4)LED SETUP MENU

COLOUR MODE
WHITE BALANCE
BOOST DRIVING
MIN RGB
MAX RGB
SMOOT FILTER
PWM FREQUENCY

LED Setup

A001

LED SETUP

Colour Mode

COLOUR MODE
This menu allow to select the LED'S colour mode control system between RGB, CMYK or HSV

Set Colour Mode

RGB
CMYK
HSV

Actual RGB

RGB Mode (Default)

Ch7 = Dimmer / Ch8 = Red Ch9= Green / Ch10= BLue

CMYK Mode

Ch7 = Black / Ch8 = Cyan
Ch9= Magenta / Ch10= Yellow

HSV Mode

Ch7 = Nu / Ch8 = Hue
Ch9= Saturation / Ch10= Value

White balance

WHITE BALANCE
This menu allow to select the levels for Red,Green and blue obtaining a custom White

Setting WHITE

RED 255
GREEN 255
BLUE 255

The Custom White can be Recall by setting DMX channel 11 (WHITE) in the range 172-213

Boost Driving

BOOST DRIVING
This menu allow to increase the LED's current from 350mA to 500 mA

Setting LED BOOST BOOST Status

Active

Warning TEMPERATURE
PROTECTION ACTIVATED

Whit BOOST active,the LED's current is setted to 500mA (30%more gain).
Default = Disable
NTC thermal protection active.

Min RGB

RGB MINIMUM VALUES
This menu allow to select the minimum levels for Red,Green and blue

Setting RGB Min

Min RED : 000
Min GREEN : 000
Min BLUE : 000

These settings have priority on Master Dimmer (DMX channel 7)

Max RGB

RGB MAXIMUM VALUES
This menu allow to select the maximum levels for Red,Green and blue

Setting RGB Max

Max RED : 000
Max GREEN: 000
Max BLUE : 000

These settings have priority on Master Dimmer (DMX channel 7)

Smooth Filter

SMOOTH FILTER VALUE

This menu allow to select the value of the delay(in milliseconds) for RGB channels reaction to DMX or Program variation.

001=2.5 ms delay (Fast response)
100=250 ms delay (Slow response)

Set Smooth Filter

Filter Value: 010

ENTER to CONFIRM

Range = 001 / 100

Default = 10

001 = 2.5ms (Instant response to DMX variation)

100 = 250ms (Smooth response to DMX variation)

PWM frequency

PWM FREQUENCY VALUE

This menu allow to adjust the PWM frequency value (Hz) in order to reduce flickering in the process of your camera recordings

Set PWM Frequency

427 Hz

1000 Hz

2000 Hz

4000 Hz

6000 Hz

Actual 427 Hz

5 different PWM frequencies available.

Default = 427 Hz

TWILIGHT

This menu show the twilight level.

Measure TWILIGHT

Value : 0314

Light sensor Twilight level
(Located on the front panel of the unit)

ENTER

9- OPENING UP THE PROJECTOR HOUSING:

It is possible to inspect the inside of the projector by removing the covers as shown below.

Attention: REMOVE MAINS POWER PRIOR TO ACCESSING THE PROJECTOR'S INTERNAL COMPONENTS.

Proceed as per the pictures below

9.1- Arms

Remove these two screws on both arm sides

9.2- Base

Remove the 12 screws located on the base

10- CHANGING THE LENSES

Delta R Full Color

Optical Lenses set can be interchanged by users.

Three different models are available: (spot / medium /wide)

Lenses set spot (cod. 03.LK.008)

Lenses set medium (cod. 03.LK.001)

Lenses set wide (cod. 03.LK.002)

To change the lenses set, proceed as per the pictures below

Remove these 12 screws on both sides of the rear head assembly

Remove the top head cover

Remove these 8 screws and change the panel

ATTENTION:
Never touch LEDs and Lenses
with hands

10- CHANGING THE LENSES

Delta R Triled

Optical Lenses set can be interchanged by users.

Three different models are available: (spot / medium /wide)

Lenses set spot (cod. 03.LK.008)

Lenses set medium (cod. 03.LK.001)

Lenses set wide (cod. 03.LK.002)

To change the lenses set, proceed as per the pictures below

Remove these 12 screws on both sides of the rear head assembly

Remove the top head cover

Remove these 6 screws and change the panel

ATTENTION:
Never touch LEDs and Lenses
with hands

11- PERIODIC CLEANING:

Front lenses Glass

The dust can reduce the luminous output substantially. Regularly clean the front lenses glass using a soft cotton cloth, dampened with a specialist glasses cleaning solution.

12- PERIODIC CONTROLS:

Mechanical parts:

Periodically check all mechanical parts and the gaskets, replacing them if necessary.

Electrical components:

Check all electrical components for correct earthing and proper attachment of all connectors, refastening if necessary.

Fuse replacement:

Locate the fuse, which protect the electronics, in the base of the DELTA R.

Using a multimeter, test the condition of the fuse, replacing it with one of equivalent type if necessary.

Attention: Disconnect mains power prior to removing the projector housing.
